

Please do not overturn New Jersey's telemarketing law. Anything less than a "total do not call" option is like having no law at all. As a US citizen and a consumer I should have the option as to whether my home is invaded by unwanted calls. Do not force me to take my phone off the hook from 4-8pm for the phone service I pay for. This is an infringement on my rights. This amounts to giving my rights away and disregarding my right to privacy.
